

Environmental Policy

As a company SPS is committed to ensuring our activities are conducted with the minimum impact on the environment as practicably possible.

The company is continually assessing the effect that our operations have on the environment. All our activities will be conducted in compliance with local legislation.

The company will seek to:

- Have the necessary control measures in place to protect the natural environment and conserve resources.
- Minimise emissions of noise and air pollution.
- Minimise use of energy, reduce waste and maximise recycling and reuse of materials arising from our business activities.
- Promote environmental awareness to all stakeholders who may create a significant impact upon the environment.
- Ensure compliance with applicable environmental legislation, all current guidelines and regulations.
- To continually improve our environmental performance.
- Establish and measure environmental performance against the above mentioned objectives and any other targets identified by the management.

The company practices the principles of the Reduce, Reuse and Recycle philosophy.

The board of directors have overall responsibility to ensure this policy is adhered to, all base managers, supervisors, employees and sub-contractors are responsible for the maintenance of this policy.

Additionally, management will annually review this policy and will do so in the event of any major organisational changes, new legislation or serious incident.

Signed:

Mr. Fred Rogers
Managing Director
